Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 13-20 are drawn to gateway between networks, classified in class 370, subclass 401.
 - II. Claims 8-12 are drawn to particular switching network arrangement, classified in class 370, subclass 386.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I is concerned with a routing and switching apparatus; while invention II is concerned with a fabric card compatible with a synchronous transport signal for use in a routing and switching apparatus. See MPEP § 806.05(d).
3. Because these invention are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
